Always Being Updated ~ Call for Updates

**Please Adopt, Don't Buy**

**HANK** - Hank will be 3 years old first week in May 2017. He was neutered in February 2017. He weighed in at 159 pounds (typical size of an adult "teacup pig") and is in very good health. He will come when called, likes to follow his foster person around while doing chores in the yard. Not a big belly-rubber yet, but mostly enjoys his butt rubbed and scratching behind the ears. He will most certainly warm up more with a forever family and as his hormones taper off now that he has been neutered. HANK is currently located in Orange County, CA. If you would like to meet and possibly

adopt HANK, please contact Andrew at [abzoom@live.com](mailto:abzoom@live.com) or (714) 206-8131.

**RAISIN** - Raisin is a pretty cool breed that we rarely see in rescue... she's a Guinea pig! Seriously, they are the original Guinea pigs, aka Guinea Hogs. She is your typical farm girl that likes mud, picking on the other pigs, eating and of course begging for food... because she is a pig after all! Her previous owner loved her dearly and could sadly no longer care for her. She doesn't ask for much, just warm soft straw, a warm pen in the winter and a cool mud hole during the summer. She does like to eat and currently weighs around 300lbs. She just wants a new life that will love her as much as we all have. Contact: LEGEND ANIMAL RESCUE, 619-518-8778, Ramona, CA 92065 or E-mail: [sdago777@hotmail.com](mailto:sdago777@hotmail.com)

**PINK** - The owner is no longer home often enough to care for her any longer. She is about 3 or 4 years old and was spayed at as a piglet. She used to be a house pig and was potty trained. She would potty in a large litter box that was made for her. She was not a fan of the tile floor and would rather be outside if there is not carpet. She good with dogs, large and small. She has also been raised around cats. She is not leash trained but she will follow you around for popcorn. She does NOT like to be held. Pink has done very well adjusting to her foster home and there are no obvious medical issues that have been seen. She lives outside and also likes to join you in the home. She does very well with dogs (large and small) and cats. She will sleep next to your bed on (or under) a padded dog bed if you let her in at night. She can also sleep outside in her pig house without a problem. She will greet you at the front door in the morning and also come up to the car when you get home from running errands. She loves to cruise the yard with the dogs or hang out on the back patio with the human family. It takes her some time to get to know new people but does like the interaction. Popcorn is her favorite treat and she will follow you around the yard for it. Adoption fee: \$35.00 \*\*\*Applications now being accepted\*\*\* Contact: Apple Valley Animal Services, 22131 Powhatan Road, Apple Valley, CA 92307, 760-240-7000 ext. 7555 and Ask for **Animal ID#164671**
